NET/C# • Azure DevOps • Node.js • OpenAI API • xAI API • Git • GitHub • CI/CD
Agile/Scrum • Responsive Design • JSON • MongoDB • Performance Optimization

Experience

SOFTWARE DEVELOPER II, COMMON FORGE VENTURES; REMOTE – FEB 2022 – FEB 2025

Led front-end development of SaaS applications using Angular and TypeScript, integrating with .NET Core, SQL Server, and GCP.

- Developed responsive web components from Figma wireframes.
- Troubleshooting, debugging, and maintenance of RESTful Web APIs.
- Defined app requirements and workflows with Product Managers.
- Delivered features in 2-week Agile sprints, prioritizing user-focused requirements.

SOFTWARE DEVELOPER II, KANTAR; AUSTIN, TX – 2000 – 2021

Full stack development for enterprise web tools, specializing in modern, responsive interfaces with Angular while supporting .NET Core back-ends.

- Front-end development for Azure-based apps (Angular, .NET Core, SQL).
- Updated API controllers and wrote Entity Framework migrations.
- Utilized Git+DevOps for version control and CI/CD.
- Collaborated with global teams to support and enhance .NET web applications with services in Azure.

Education

University of Houston, Houston, TX — Bachelor of Science 1996
