Professional Summary

Detail-oriented Frontend Developer with deep expertise in JavaScript, TypeScript, Angular, and responsive UI design. Skilled in building fast, accessible, and mobile-friendly web apps. Experienced in integrating REST APIs and adding intelligent features using OpenAI and xAI. Comfortable with backend development using Node.js and .NET/C#.

Authorized to work in the US for any employer

Work Experience

Software Developer
Common Forge Ventures-Remote
February 2022 to February 2025

Built and maintained web-based SaaS applications, tying them into backend tech. Led front-end development on multiple project and event management applications, working in an Agile environment.

• Owned Angular development with TypeScript, SASS, and JavaScript, turning UI mockups into clean, working code that holds up across browsers.

• Collaborated on multiple web applications (Angular, .NET Core, SQL Server, GCP) from initial design stage to fully deployed production apps.

• Teamed up with UI/UX designers and Product Managers to nail down app requirements and workflows.

• Integrated third-party APIs (like Auth0 and Google Maps) to pull in live data, making features work seamlessly without overcomplicating things.

• Troubleshooting, debugging, and maintenance of RESTful Web APIs.

• Utilized Git+DevOps for version control and CI/CD, keeping the team's code in sync even with everyone working remote.

Software Developer
Kantar-Austin, TX
2000 to November 2021

Full stack development for enterprise web tools, specializing in modern, responsive interfaces with Angular while supporting .NET Core back-ends across long-term projects for global teams.

• Directed front-end for Kantar Pricing and Kantar Project, two Azure-based apps (Angular, .NET Core, SQL) for pricing and project management.

• Designed front end forms and online reports. Created support pages to configure products, manage security roles, and export data.

• Updated API controllers, wrote Entity Framework migrations, and managed application deployments.

• Contributed to earlier tools like Survey Director, building web services and UIs tied to .NET APIs, sharpening full-stack skills over time.

Education

Bachelor of Science
University of Houston-Houston, TX
June 1996
